

Title: SQL Injection
Severity: 4/10
Risk Level: MEDIUM

URL: <http://testphp.vulnweb.com:80/listproducts.php?cat=1>
Parameter: cat

Description:

- SQL Injection detected on parameter `cat`. The parameter influences backend database queries and re
- Cross-Site Scripting detected on `cat`. Input is reflected or stored without proper sanitization.
- Medium severity may allow limited data exposure or client-side attacks.

Proof of Concept:

<http://testphp.vulnweb.com:80/listproducts.php?cat=1?cat=<payload>>

Impact:

Potential data leakage, account takeover, or client-side attack.

Remediation:

Validate input, sanitize output, and use parameterized queries.
